Problem Solving

Professional Experience

Aarkey Techno Consultancy PVT LTD, Intern   10/2023 – present
                                                                   Nagpur, India
- Gained hands-on experience in .NET Core MVC development.
- Developed backend services for reading barcodes and working with RDLC reports.
- Integrated Tally with software for streamlined accounting and implemented email integration using SMTP.
- Built services to provide reminders for customers, vendors, and employees for follow-ups.
- Worked with PRN files and processed barcode data.
- Made the software user-friendly to simplify tasks for users.

Projects

EROS Warehouse Management System
- Developed a comprehensive warehouse management system including sales order, purchase order, product storage, picking, loading, and dispatch.
- Generated various reports such as aging, ledger report, and product stock report.

AARKEY Warehouse Management System
- Contributed to the Aarkey warehouse system, managing different types of inventory products (roll bundle, hardware, software, system, service types, marketing).
- Learn to integrate Tally with the software for easy accounting and developed services to send follow-up reminders to customers, vendors, and employees.

Certificates

IEEE Bombay Section:
Actively participating in Innovation 2023 Bus Pass System

Green Energy for Sustainable Development:
2020 Paper Presentation on Dynamic Assessment

State Level Paper Presentaion
Online Bus Pass System
